UML Class Diagram

Josip Muzic | January 30, 2020

WeatherStation

- sensor: KelvinTempSensor
- barometer: Barometer
- PERIOD: long
- KTOC: int
- currentReading: int
- currentPressure: double

+ run()
+ getCelsius(): double
+ getKelvin(): double
+ getFahrenheit(): double
+ getInches(): double
+ getMilibars(): double

KelvinTempSensor

- MINREADING: int
- MAXREADING: int
- DEFAULT: int
- currentReading: int
- increasing: boolean
- rand: Random

+ reading(): int

Barometer

- MIN: double
- MAX: double
- DEFAULT: double
- currentPressure: double
- increasing: boolean
- rand: Random

+ pressure(): double

SwingUI

- celsiusField: JLabel
- kelvinField: JLabel
- fahrenheitField: JLabel
- inchesField: JLabel
- millibarField: JLabel
- station: WeatherStation
- labelFont: Font

+ setCelsiusJLabel()
+ setKelvinJLabel()
+ setFahrenheitJLabel()
+ setInchesJLabel()
+ setMillibarsJLabel()
+ createLabel(): JLabel
+ update()

TextUI

- station: WeatherStation

+ update()
